

IMNA Solution will share the following deliverables to the FHIR IL community:

1. Focused, practical action items from some internal and external meetings that might be useful.
2. Selection of existing or customized extensions and profiles for various FHIR resources, for example from IL-Core, US-Core, PRO implementation guides etc.
3. Implementation architecture documents, which includes two parts: The establishment of the FHIR infrastructure, and the integration of IMNA infrastructure to Rambam Health Campus.
4. Publishing our work including some useful codes for the community in Simplifier.NET and in the IL forums.
